

REFRIGERATED WAREHOUSE APPLICATIONS

KoldSPAN™ insulated metal panels by KPS Global® are well suited for exterior and interior walls and ceiling applications. The lightly corrugated profile on both faces creates symmetry on the outside of the building and room to room within. The minor rib provides a flattened appearance. Mesa panels are ideal for cold storage, commercial, institutional and industrial applications.

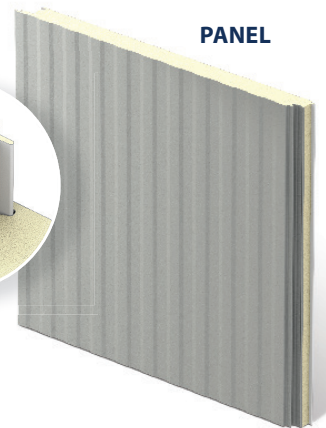

PACKAGED SOLUTIONS

Our experienced teams create custom solutions for complex projects leveraging in-house design and engineering teams. With an extensive vendor list of components to complete the project. KPS Global offers installation and turnkey contracting services where Project Managers handle everything from start to finish anywhere in North America for a seamless process.
