

STRONG HERITAGE
FORWARD THINKING

KPS Global® is the industry-leading manufacturer of walk-in coolers and freezers for supermarket and convenience stores along with insulated panel systems for industrial utility enclosures, refrigerated warehouses and scientific chambers. KPS Global also offers seamless installation and turnkey general contracting services in addition to being a supplier of aftermarket parts and replacement equipment.

Through cutting-edge innovation and an unyielding commitment to customer satisfaction, KPS Global delivers custom solutions to meet project specific needs.

WHAT WE DO

KPS Global® designs, manufactures and installs insulated panel systems. Our product is highly adaptable in application for convenience and grocery stores, foodservice or other retail environments as well as scientific, warehouse and industrial enclosures. We have five, strategically-located manufacturing facilities to serve customers anywhere in the world. We've earned our reputation for manufacturing excellence by creating thousands of custom units. In addition, we stock commonly-sized walk-in coolers and freezers that are available to ship in 72 hours.

KPS Global is also a supplier of aftermarket parts and replacement equipment, including manufactured doors. We sell OEM parts for the most widely-used applications ranging from latches, hinges and gaskets to liner panels and an assortment of door options.

Not only does KPS Global provide you with the panels and all the components needed to outfit your walk-in, we also offer complete installation services for new or replacement units. With over 500 years of combined construction and installation experience, KPS Global is a trusted solution in the industry.

DESIGN Our experienced in-house designers handle special space and construction considerations and design plans to meet exact specifications for your project.	ENGINEER Our in-house engineering team evaluates wind, seismic, snow and other structural loads to ensure design integrity for project specific applications.	QUOTE To meet project demands, a dedicated account team will assess the project needs and provide a customized quote for products and services.
MANUFACTURE In addition to manufacturing insulated panel systems, we also manufacture liner panels and custom walk-in cooler and freezer doors.	COMPONENTS We offer everything you need to outfit your unit including traffic or display doors, alarms, lighting, shelving, refrigeration and more.	PARTS We offer a wide variety of replacement equipment and aftermarket parts, including replacement doors regardless of manufacturer.
INSTALLATION With the largest network of installation contractors, a KPS Global employee manages all installations. A single point of contact and a fixed price means no hidden costs.	TURNKEY SERVICES With Turnkey General Contracting Services, a single point of contact ensures a new, remodel or replacement project is on time, on budget and to specifications.	FIELD OPERATIONS Our factory-trained employees are available to be onsite to survey conditions or measure units for repair, replacement or expansion, regardless of manufacturer.

GLOBAL®

**SUSTAINABILITY
SOLUTIONS**

At KPS Global, we are focused on innovating sustainable products that not only serve our customers but also protect our environment.

KPS Global® is the first panel manufacturer with the ability to supply environmentally-friendly HFO products across North America. KPSG converted its five facilities from a hydrofluorocarbon (HFC) to a hydrofluoroolefin (HFO) urethane blowing agent well ahead of any industry regulations, advancing our sustainability objectives.

We're committed to educating the market about the importance of carbon footprint reduction and energy savings. Our efforts have been recognized with awards that acknowledge companies for their environmental achievements and commitment to innovation and sustainability practices.

FUSIONFRAME®, our patented cold storage panel system, was named a **2019** winner in the following categories: "Refrigeration Product of the Year-Components & Peripherals" and "Refrigeration Innovation of the Year System/Process/Standalone". **FUSIONFRAME** replaces traditional wood structural framing and delivers optimal thermal-envelope performance, lowers energy usage and utility costs, and offers a reduced carbon footprint.

Additionally, KPS Global was named a winner of a **2019 SEAL** Business Sustainability Award, which celebrates leadership, transparency, and commitment to sustainable business practices. Our award-winning submission was the introduction of **FUSIONFRAME**. Reduced carbon footprint and other environmental considerations should be forefront when installing new cooler or freezer equipment that will be relied upon to perform for a number of years.

These awards underscore our commitment to innovate environmentally-sensitive and sustainable products in our industry.

SEAL
AWARD WINNER
2019

WINNER

FUSIONFRAME®

The patented **FUSIONFRAME®** cold storage panel system offers the Best of Both Worlds by integrating the structural benefits of wood with the high-performing insulative properties of foam, drastically enhancing the thermal performance and energy savings of cold storage units. With this system from KPS Global, you never have to compromise.

Never Compromise

Hybrid rail solution combines a structural core fused together with high-performing polyurethane foam insulation.

The structural core is comparable to the structural performance of wood.

Eliminates the thermal bridge associated with wood frame panels.

Insulation jacket surrounding panel joints prevents ice buildup in the frame.

Significantly lowers condensation risk.

Increased R-Value provides 4x higher thermal performance than a traditional wood rail system.

Increased energy efficiency due to reduced heat gain.

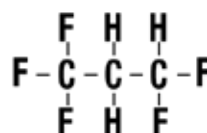

Significantly reduces carbon footprint.

KPS Global developed **FUSIONFRAME** out of a desire to advance the industry while eliminating natural resources from our products. The result is a product focused on providing sustainable solutions for our customers while protecting the environment. **FUSIONFRAME** moves away from wood to a post-industrial recycled plastic and away from HFCs to an HFO polyurethane jacket.

**FROM WOOD TO
POST-INDUSTRIAL

PUR JACKET**

RETAIL

KPS Global is the largest provider of custom walk-ins to the convenience store, dollar store, supermarket and warehouse club markets. With each unit custom built to your specifications, our walk-in coolers and freezers set the industry standard. With access to our design and engineering services, your project will be built to your specifications.

KPSG ensures quality, durability and top-notch customer service.

BEER CAVES

Beer caves provide convenience and liquor stores a shopping experience for their customers. KPSG is able to create custom solutions for beer caves to match the style and size requirements.

DOLLAR

With a tight footprint and the need for maximized cold storage space, KPS Global is able to provide discount variety retailers a cost-effective solution to their unique needs.

C-STORE

Customizable options for convenience stores or beer caves including refrigeration, metal finishes, components like shelving and lighting, as well as display and traffic doors, are available to meet your job specific needs by experienced KPS Global employees.

CLUB

Large applications in the retail environment require deep industry experience and a team of folks who support your project from start to finish. KPS Global has a dedicated team who focus on wholesale or club stores that are all custom built according to project specifications.

CLICK & COLLECT

Due to changing shopping habits of consumers wanting convenience and avoiding long lines at checkout, many retailers are now offering a click and collect program. KPS Global is uniquely positioned to solve this growing business problem due to years of manufacturing cold storage solutions and coupled with an in-house design and engineering team, so the consumer's ice cream is frozen, but their tomatoes are not!

GROCERY

KPS Global is the largest provider of custom walk-ins in the nation. Quality, durability and service define our products for supermarkets. With each unit custom built to your specifications, our walk-in coolers and freezers set the standard for innovation and efficiency. KPSG leverages over half a century of experience in the design, manufacturing and service of walk-in coolers and freezers.

eCOMMERCE GROCERY FULFILLMENT

KPS Global is an expert in climate control solutions for various retail formats, including eCommerce for grocery. We understand how to manage different temperature levels in any environment. In-house design and engineering teams can meet project specifications, and retailers are able to leverage our knowledge and experience to solve the challenging cold storage requirements online grocery pickup presents.

KPS Global's versatile product offering can be customized to meet your specific project requirements. With design and engineering teams in-house, along with partners in automation and micro-fulfillment, we can deliver highly customized solutions. No matter how you fulfill your online grocery orders (drive-up, in-store, co-located, or offsite), we have a solution. With five manufacturing facilities strategically located across the country, KPSG has the scale and capacity to execute your OGP program needs.

KPS Global

Traditional Case

FOODSERVICE

With a long heritage of providing solutions to the foodservice industry, KPS Global delivers walk-ins using **FUSIONFRAME®** construction that meet NSF requirements and are available with a variety of options depending on your project.

- CENTRAL KITCHENS
- CORRECTIONAL INSTITUTIONS
- COOK/CHILL FACILITIES
- FLIGHT KITCHENS
- MILITARY FACILITIES
- STADIUMS AND ENTERTAINMENT VENUES
- RESTAURANTS
- UNIVERSITIES
- MEDICAL CENTERS/HOSPITALS

CENTRAL KITCHENS

KPS Global has experience designing walk-ins used in central kitchens for various applications such as flight catering, schools and hospitality.

We understand the need to work with the project specifications and offer flexible solutions to meet all your project demands.

With in-house design and engineering capabilities, KPS Global is here to help with even the most complex refrigeration and structural requirements.

We offer a complete package with panels, refrigeration systems, components and installation to ensure your project goes smoothly.

With dedicated teams serving specific markets, you'll find working with KPS Global is easy. In addition, we offer competitive pricing and superior value.

GHOST KITCHENS

Ghost kitchens are commercial kitchens specifically focused on take-out and delivery. With changing consumer trends and advances in technology, ghost kitchens have come on the scene to offer relief to restaurants struggling to meet catering/take-out demands out of their existing kitchen space.

KPS Global takes a collaborative approach designing, specifying and supplying equipment to meet the needs of ghost kitchens. With experts available on refrigeration, engineering and cold storage installation, KPS Global is here to help.

INDUSTRIAL

KPS Global designs and manufactures modular rooms to accommodate various environmental requirements. Panel systems can be custom sized to fit any design. With various panel thicknesses, humidity and temperature requirements are easily controlled. Designed as single or multi-compartment units that can be modified to increase or decrease in size, insulated panel systems offer maximum control of temperature, dust and noise.

KPS Global offers a cost-effective solution as panels are optimized for price and R-value specific to your project.

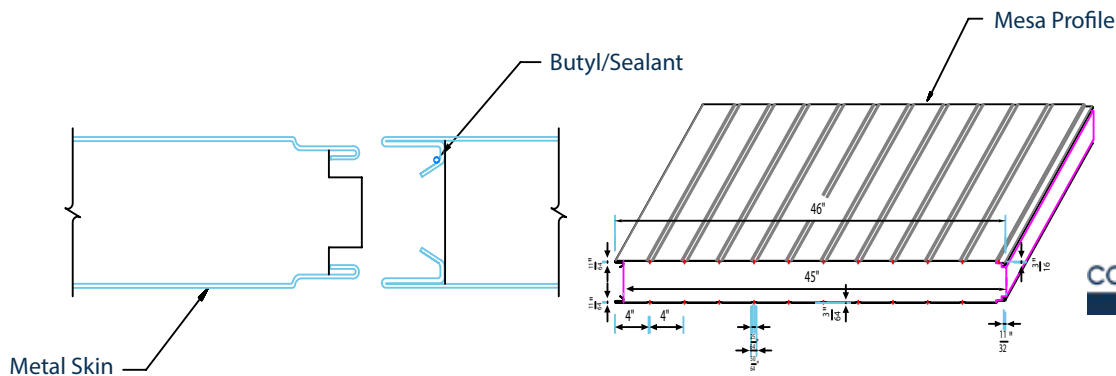

CONTINUOUS LINE PANELS

CLP™ panels by KPS Global offer a cost-effective solution for large scale applications. CLP panels, with an EPS core, can span farther without additional structural support. With short lead times and easy installation, you are able to get your project completed sooner.

CLP panels are ideally suited for interior applications such as:

- Food Processing Facilities
- Distribution Warehouses
- Controlled Environment Rooms
- Mechanical Rooms
- Clean Rooms
- Plasma Banks
- Horticulture Rooms

CLP panels are thermally efficient, strong, light weight and easy to install using a foam-to-foam, tongue and groove joint. The panels are made to order, in a variety of thicknesses and in lengths up to 45 feet, allowing for longer spans and lower installation costs.

SCIENTIFIC APPLICATIONS

Insulated panels by KPS Global provide a cost-effective option to maintain a stable environment for sensitive, high-technology testing equipment. KPSG also offers high-density foam frames, in a variety of panel finishes and build options. All panel systems are designed as single or multi-compartment chambers that can be modified easily.

WAREHOUSE APPLICATIONS

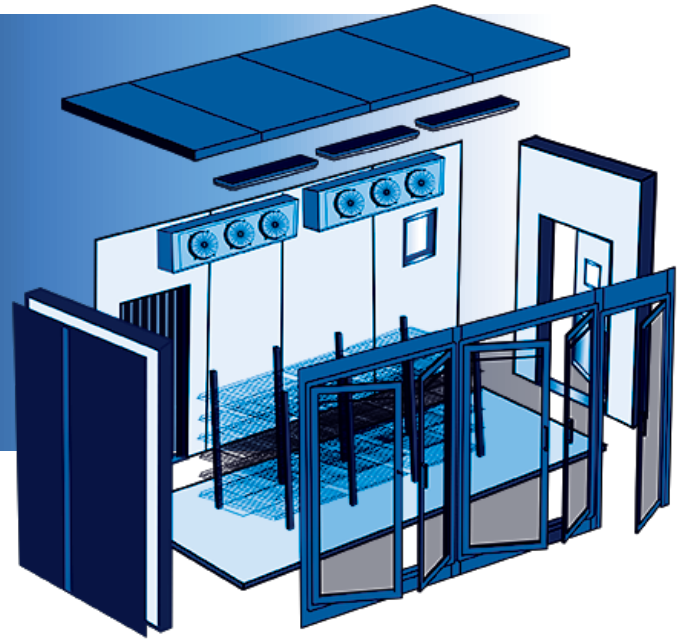

Whether your need is large scale coolers, processing rooms or storage facilities, our mechanical engineering services team can design steel support and determine load requirements for project specific needs. Panels can be designed to meet NSF, USDA and FM4880 approved specifications. Other large scale applications include breweries, food banks and process facilities.

EQUIPMENT ENCLOSURES

Panel systems by KPS Global can provide a building that protects your equipment with limited maintenance and is ideal for locations not easily accessible. Our in-house design team is available to handle special construction and noise considerations to further support your project. The fully customizable design gives the equipment a strong, modular structure that can sustain harsh outdoor environments. Wall panels are sloped creating a pitch in the roof for precipitation run off. Gutters, downspouts and roof configurations are all designed to your specifications. KPS Global can pre-assemble units on liftable skids, allowing you to drop in a completed unit on rough terrain.

MORE THAN JUST THE BOX

DISPLAY DOORS

From floral arrangements to beverages, specs can include:

- Anti-fog glass
- Specific humidity controls
- And more!

TRAFFIC DOORS

Fast, affordable two-way movement solution tailored to meet:

- A variety of applications
- Functionality goals
- Cosmetic needs

MANUFACTURED DOORS

Custom-made swing doors and door sections:

- Replace any brand walk-in door
- Come with a variety of trims, wiring and finishing parts
- Ship 7-10 days from approval

ALARMS/CONTROLS

Protect equipment and promote energy savings! Demand defrost controls for walk-in coolers and freezers:

- Provide efficient temperature/defrost control
- Factory-mounted or retrofitted alarms/alerts:
- Can be monitored on or offsite

ASSET PROTECTION

Protects walk-ins from damage/wear and tear:

- Bollards protect impact points, corners
- Box rail outside/inside box
- Protects sliding doors
- Shock absorption minimizes floor damage

NET BARRIER SYSTEMS

Fall protection/safety netting:

- Prevents falls
- Keeps workers safe

LIGHTING

KPSG can meet your lighting needs in any situation:

- Lumen Output
- Color Rendering
- Index Color
- Temperature
- Temperature Applications
- Safety/Security
- Wireless Controls
- Dimmable
- Rating
- Energy Consumption
- Cost
- Product Life

REFRIGERATION

Cooling units from ½ HP to 80 HP to fit any size project:

- In-house experts with 100 years sizing experience
- Competitive pricing from multiple manufacturers
- Components arrive together

SHELVING

A variety of shelving systems to maximize storage space in custom configured systems including:

- Gravity-fed shelving
- Movable shelving carts
- Adjustable flat shelves

LINER PANELS

Variety of liner panels to reface and insulate existing boxes:

- Improve aesthetics
- Improve R-Value
- Extend walk-in life by up to five years

REPLACEMENT PARTS

Knowledgeable parts specialists can assist with:

- Battens
- Gaskets
- Door Parts
- And more!

QUICK SHIP

WALK-INS READY TO SHIP IN 72 HOURS

KPS Global offers a quick ship option for commonly-sized walk-in coolers and freezers. Walk-ins come in a standard metal finish with a preset door placement and **INSULFRAME™** rail.

STANDARD FEATURES

- 4" **INSULFRAME™** High Density Rail Frame
- 26 Gauge Natural Embossed Aluminum-Zinc Alloy Interior and Exterior Finish
- 3'0" x 6'6" Flushmount Door
- MaxLite LED Light and Cover
- Weiss Digital Thermometer and Switch with 6' Lead

QUICK SHIP SIZE WALK-INS

- 6' x 6' 6' x 8' 6' x 10' 8' x 8'
- Manufactured to Nominal Sizes

WALK-IN COOLER COMPONENTS

- PVC Channel Screed
- Cam-Lock Tops

WALK-IN FREEZER COMPONENTS

- Floor Rated for Foot Traffic and Hand Carts (NSF Compliant) with .050 Smooth Aluminum Wear Surface
- ½" OSB Floor Backing Under Metal
- Heated Vent
- Cam-Lock Tops and Floors

WALK-IN MANUFACTURED DOOR COMPONENTS

- Fiber Reinforced Plastic (FRP) Frame
- Closer Assembly (Hydraulic)
- Spring-Assisted Hinge LH ¾" Rise
- Latch Assembly with Inside Safety Release
- Interior Safety Lock Release Handle

OPTIONS

Cam-lock floor is available for cooler in lieu of PVC Channel Screed if selected. .050 Smooth Aluminum Floor that is NSF compliant. Floor is rated for foot traffic and hand carts only.

Order Online
parts.kpsglobal.com

Order before 12:00 pm CST for 72-hour shipping on quick ship orders. Quick ship boxes are designed for indoor use only and manufactured to nominal sizes. KPS Global panel assemblies are designed to be vapor tight, not waterproof. Damage to panel assembly from exposure to splashing, spray or immersion will not be covered by warranty. Manufacturer's warranty applies. Picture does not necessarily depict actual product representation.

SPEC TO INSTALL. WE DO IT ALL.™

INSTALLATION SERVICES

KPS Global is an industry-leading manufacturer of walk-in panels and related systems, providing installation services for new or replacement walk-ins.

From installation to cleanup, one dedicated crew handles all phases of the project. This one team approach greatly reduces installation time.

**FULL SERVICE INSTALLATION
WITH JUST A SINGLE CALL!**

FIELD OPERATIONS

Our factory-trained employees are available to be onsite to survey conditions or measure units for repair, replacement or expansion, regardless of manufacturer.

**JOBS CAN BE SCHEDULED
24 HOURS A DAY.**

TURNKEY CONTRACTING

From start to finish, turnkey project managers handle the replacement or remodel of walk-ins with just a single call.

A KPS Global employee and/or superintendent is onsite during the entire job with one dedicated, onsite crew.

We take the hassle out of the process and organize everything from ordering materials to hiring subcontractors.

Jersey grocery store owner C.V. Hill wanted a better way to refrigerate perishables for his customers. C.V. built a dairy ice box that he sold for \$75, and continued to sell as the newfound business: C. V. Hill Refrigerator Works.

In another part of the country, Mr. Charles Needham begins a leading industry of walk-ins in his home garage.

Bud Hewitt founded
Kalt Manufacturing Company, Inc.

Hillphoenix

Similarly, Hill Refrigeration is purchased by another well-known refrigeration manufacturer, Phoenix Refrigeration Systems, to form Hillphoenix.

As business began to expand rapidly, it was decided to open a brand new Kysor//Needham facility in Piney Flats, Tennessee.

Kysor Industrial, Co. was sold to Scotsman Industries, consolidating Kysor//Kalt and Kysor//Needham to Kysor Panel Systems.

Food service giant and conglomerate Welbilt Corporation, a wholly owned entity of Berisford, PhL, courted Scotsman Industries and Kysor Panel Systems for acquisition for the purpose of creating the largest and strongest food service equipment organization in the world. Within the same year, Hillphoenix was also expanding rapidly through several acquisitions, one being the National Cooler Corporation in Southern California.

Manitowoc, another conglomerate and manufacturer of walk-in freezers and refrigeration products, purchased Kysor Panel Systems and made us a division of Manitowoc Walk-ins. In 2009, Hillphoenix opened a brand-new walk-in division in Fort Worth, TX.

Acquired in November, Custom Cooler brings continuous line panels as well as an international customer base to the KPS Global portfolio.

Mr. Hill establishes his first manufacturing factory to produce coolers for C.V. Hill Refrigerator Works.

Mr. Needham officially creates Charles Needham Industries Inc. and purchases a plot of land less than a mile away from where KPS Global headquarters currently sits.

KYSOR // NEEDHAM

Following Mr. Needham's death, Charles Needham Industries Inc. was purchased by Kysor Industrial Corporation forming Kysor//Needham.

KYSOR + KALT = KYSOR // KALT

Kysor Industrial, Co. sought opportunity to increase their revenue by purchasing the family owned business Kalt Manufacturing, Inc. Through this acquisition, they gained manufacturing facilities in Oregon, Arizona, and Indiana. Kalt Manufacturing, Inc. was then changed to also operate under the name Kysor//Kalt.

COOL-TEC
WALK-IN COOLERS & FREEZERS

Cooler Technology is purchased in Puyallup, WA

Kysor Panel Systems relocated its headquarters to Fossil Creek in Fort Worth, TX.

Kysor Panel Systems moves to its current location: 4201 North Beach Street.

A private equity firm, D3 Group, acquired the Manitowoc Walk-Ins division and the Hillphoenix Walk-Ins division to form what we are currently known as today: KPS Global!
