Strong heritage and forward thinking are a part of our DNA at KPS Global.[®] With over 75 years of excellent service, we continue to lead the industry in delivering custom panels that meet project-specific needs in a range of industries.

Our employees are the key to our success. From experienced in-house designers and engineers to a national installation network. Our experts collaborate to provide everything your project needs from start to finish, providing peace of mind.

DESIGN

Our experienced in-house designers take project specifications and convert them to detailed design drawings for your approval.

COMPONENTS

We offer everything you need to outfit your unit, including traffic or display doors, alarms, lighting, shelving, refrigeration and more.

ENGINEER

In-house engineers ensure design integrity by evaluating wind, seismic, snow and other structural loads.

REPLACEMENT PARTS

We offer a wide variety of replacement equipment and aftermarket parts, including OEM parts for widely used applications.

QUOTE

Our dedicated account team assesses the project needs and provides a customized quote for products and services to meet exact requirements.

INSTALLATION

With the largest installation network, specializing in building to factory specs, we ensure projects are installed quickly and efficiently.

MANUFACTURE

Our products are manufactured and shipped from one of five facilities strategically located to expedite delivery.

FIELD OPERATIONS

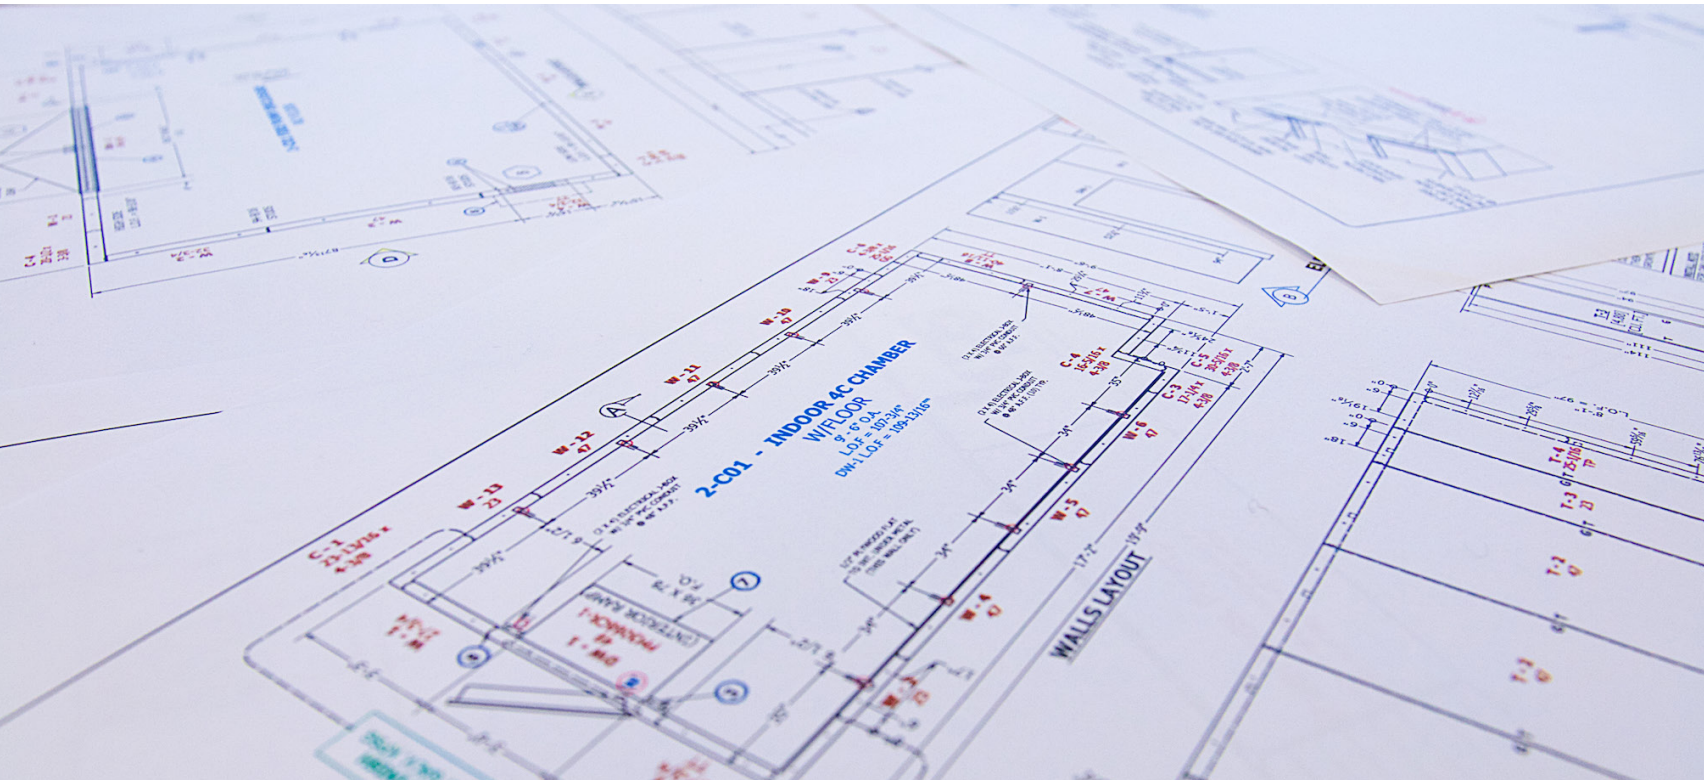

Our field operations team is available to survey site conditions or diagnose necessary repairs for any walk-in, regardless of manufacturer.

INNOVATION & SUSTAINABILITY AWARDS

ABOUT
KPS
GLOBAL

As the leading manufacturer of walk-in coolers and freezers for the food retail market, we also provide insulated panel systems for a variety of applications along the cold chain as well as custom enclosures for controlled environments. KPS Global products serve the needs of a broad range of industries:

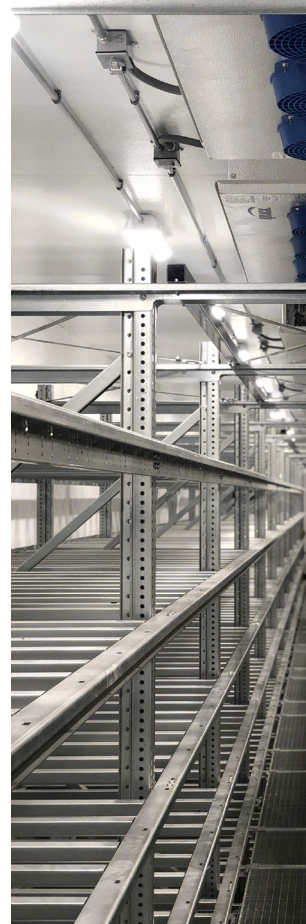

- Convenience
- Grocery
- Club
- Foodservice
- Scientific & Medical
- Cold Storage Warehouses
- Commercial Construction
- Utility Enclosures
- and more...

**INDUSTRIES
WE SERVE**

Scientific & Medical

Controlled environments for scientific needs must withstand dynamic temperature and humidity requirements. Our insulated panels are a cost-effective solution to maintaining a stable environment for various scientific applications, including vaccine storage, blood and plasma storage, test labs, clean rooms and growth chambers. We are experts in understanding and designing for sensitive environmental conditions, whether it's for controlled testing or storing and distributing lifesaving medications.

← Cold Storage Warehouse

← Temperature Controlled Robotics

eCommerce Cold Storage

With a broad product offering, we support the eCommerce grocery supply chain. We know how to integrate and manage different temperature levels in an environment to optimize for efficiency. Experienced at working with robotics, integrators and consultants, we provide an end-to-end solution for retailers who want to enter or grow their online grocery business.

← Wine Cooler

Specialty Controlled Environments

From preserving art to manufacturing guitars to building offices, our custom panel systems are manufactured to meet the requirements needed in each space. For art preservation, controlling the exact humidity and temperature conditions is key. For offices or breakrooms, our panels are an alternative to traditional construction methods.

← Dry Room Application

← Flight Kitchen

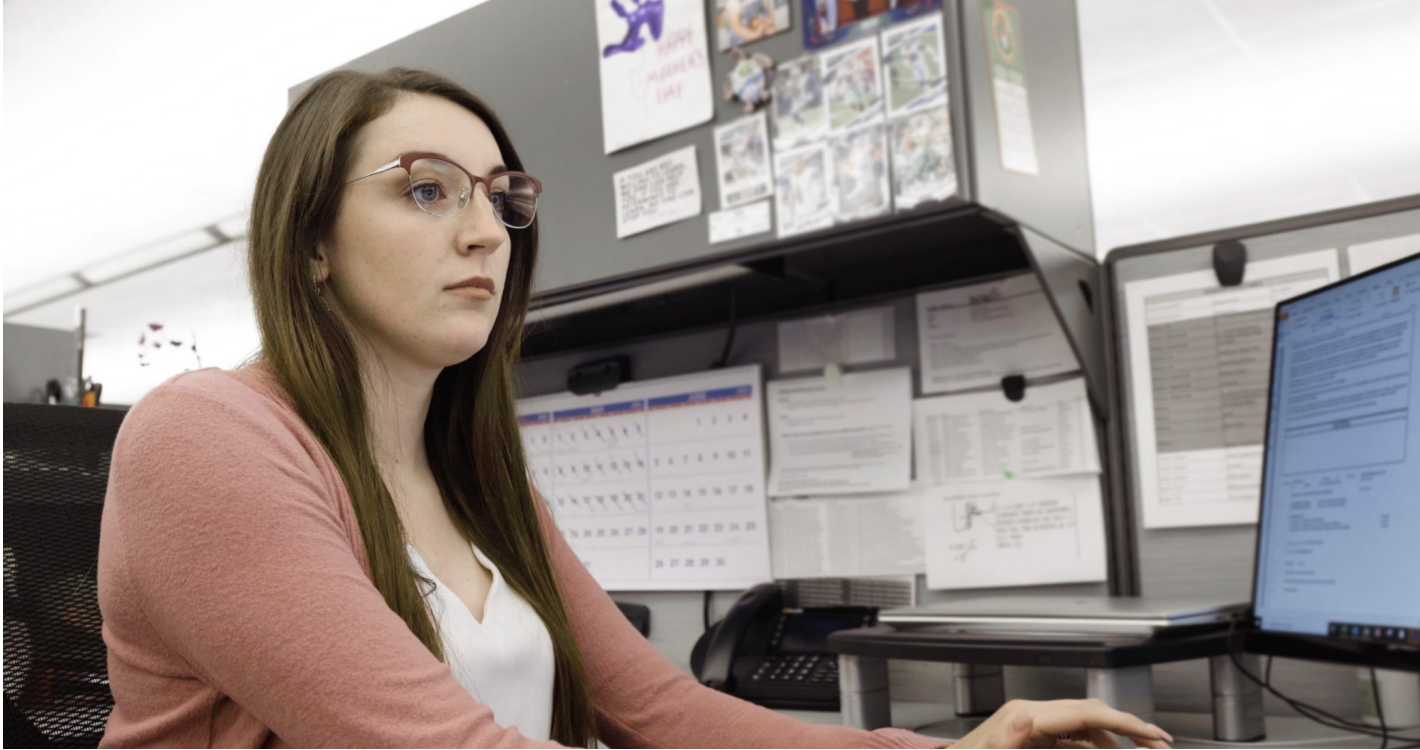

← Keg Cooler

Foodservice

Cold storage in the food industry is crucial. Our custom panel solutions can meet the needs of virtually any foodservice application. We design walk-ins to fit all types of commercial kitchens, including central kitchens, ghost kitchens, restaurants, universities, stadiums and foodbanks to keg coolers and more. Wherever your food storage needs occur, as cold storage experts, we're there to meet them.

As the most trusted and experienced end-to-end custom solution provider, you can trust our team of experts to ensure the quote, design and build process exceeds your expectations.

The KPS Global advantage starts with our people. From surveying sites for new, replacement or expansion units to factory trained installers, we have an industry-leading team of engineers, designers and project managers to ensure your project is an ongoing success.

Once the unit is operational in the field, we have a dedicated team focused on supporting you. The field service group are available to survey conditions and scope or assess repairs – regardless of manufacturer – and our aftermarket parts group is a knowledgeable team of experts who can help you find the right replacement part you need to restore your walk in.

**UNMATCHED
SERVICES
& SOLUTIONS**

KPS Global offers several options to extend the life of your walk-in.

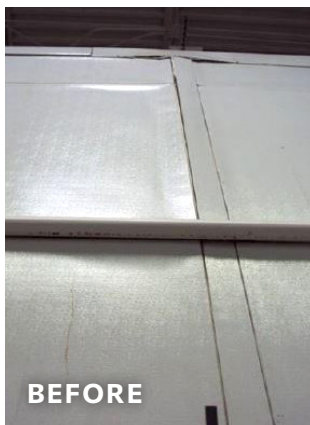

Restoring your unit can help improve the R-Value and extend the life of any brand of walk-in. Cost-effective options such as batten strips, thermal liner panels and replacement doors or flooring can improve both the look and performance of your unit.

We provide replacement doors that are manufactured to fit any brand on the market. Our custom doors overlap the panels of your existing walk-in to ensure proper fit and seal and are made to order with a variety of options.

1947 → Charles Needham began making walk-ins in his home garage.

1956 → Mr. Needham officially creates Charles Needham Industries Inc. and purchases a plot of land less than a mile away from where KPS Global headquarters currently sits.

1957 → Bud Hewitt founded Kalt Manufacturing Company Inc.

1987 → Charles Needham Industries Inc. was purchased by Kysor Industrial Corporation, forming Kysor//Needham.

1994 → Hill Refrigeration is purchased by another well-known refrigeration manufacturer, Phoenix Refrigeration Systems, to form Hillphoenix.

Kysor Industrial Co. purchased Kalt Manufacturing Inc. and gained manufacturing facilities in Oregon, Arizona, and Indiana. Kalt Manufacturing Inc. was then changed to also operate under the name Kysor//Kalt.

Kysor//Needham opens a facility in Piney Flats, TN.

1997 → Kysor Industrial Co. was sold to Scotsman Industries, consolidating Kysor//Kalt and Kysor//Needham to Kysor Panel Systems.

2000 → Welbilt Corporation, acquired Scotsman Industries.

Hillphoenix acquires National Cooler Corporation in Southern California.

2006 → Kysor Panel Systems moves to its current location on Beach Street in Fort Worth, Texas.

2008 → Manitowoc, another conglomerate of refrigeration products, purchased Kysor Panel Systems.

2015 → D3 Group acquires the Manitowoc Walk-Ins division and the Hillphoenix Walk-Ins division to form KPS Global.

2018 → KPS Global acquires Custom Cooler Inc, adding continuous line panels as well as an international customer base to the KPS Global portfolio.

2024 → KPS Global opens the Innovation Center located near their headquarters in Fort Worth, Texas.

Viessmann Generations Group, a purpose-driven family company with a heritage of 107 years, acquires KPS Global in October.

STRONG HERITAGE, FORWARD THINKING
