GLOBAL®

## DISPLAY DOORS

Whether displaying floral arrangements or beverages, you can count on KPS Global for many kinds of display doors that meet your specifications including anti-fog glass or specific humidity controls.

## TRAFFIC DOORS

Traffic doors are a cost-effective solution for fast and efficient two-way movement through an opening where some barriers are required. These doors can be tailored to suit many different applications in the marketplace to meet your functional and cosmetic needs.

## MANUFACTURED DOORS

Made-to-order swing doors and door sections are available to ship five to seven days from approval. KPS Global can provide custom manufactured doors to replace any brand walk-in on the market. All our doors are custom made with a variety of trims and all the components needed to replace the existing door including wiring, heated sweeps, latches and closures.

## ALARMS/CONTROLS

Demand defrost provides more efficient temperature control for walk-in coolers and freezers and defrost control for freezers. Stored products have better shelf-life endurance when temperatures are maintained at set levels, even though ambient temperatures and humidity levels vary widely. Alarms and alerts can be factory mounted or retrofitted and monitored on or offsite. Reliable components promote energy savings and protect compressors from short cycling.

## ASSET PROTECTION

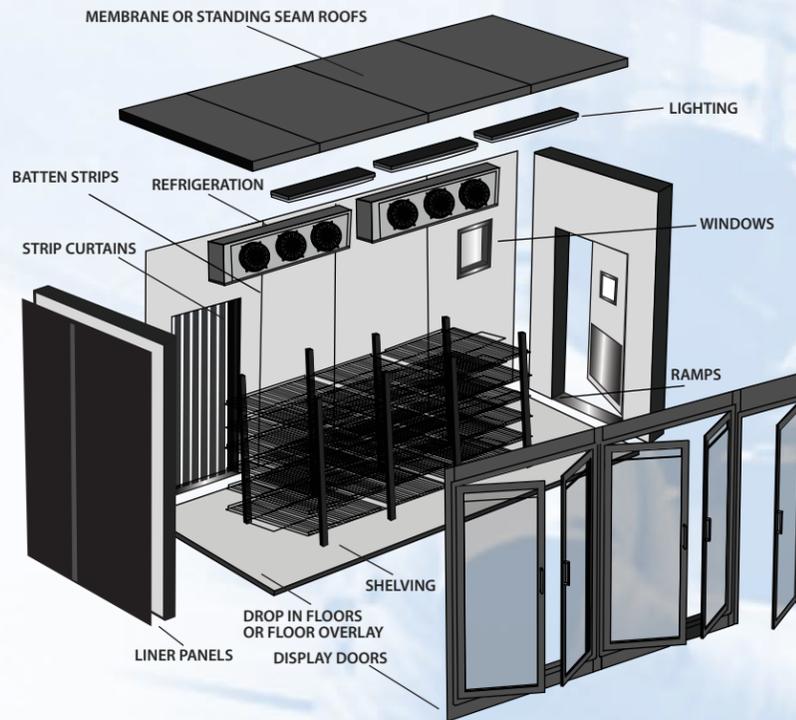

As soon as your walk-in is installed it is vulnerable to damage from impact and spearing by forklifts and floor jacks. Protecting potential points of impact inside and outside of the box is an investment in box longevity and performance. Shock absorption also minimizes impact damage to concrete floors. We recommend and install:

- Bollards to protect impact points and absorb shock around box corners and doors
- A protective margin of box rail outside/inside the box
- Protection in areas where sliding doors open/close to keep the area clear for door operation

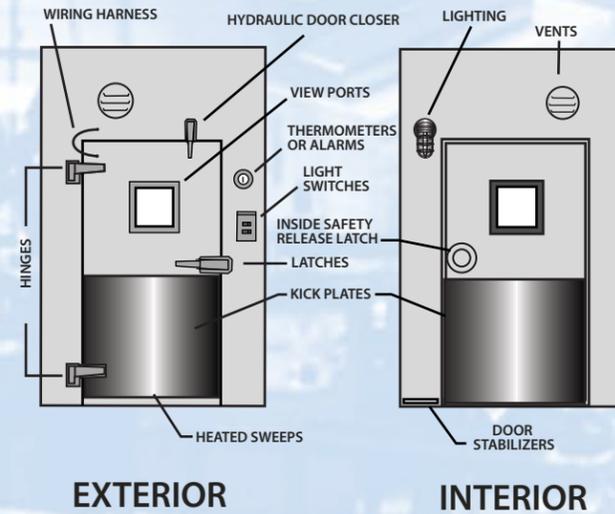

## NET BARRIER SYSTEMS

Protect workers from falling with safety netting atop your walk-ins. Safety is always top of mind with KPS Global. We can help you with fall protection/safety netting.

# SPEC TO INSTALL. WE DO IT ALL.

### MANUFACTURED DOORS

KPS Global® earned its reputation for innovation and manufacturing excellence as we created thousands of custom boxes for retail, industrial and scientific applications. KPS Global® sets the standard for quality and efficiency and can handle any project, big or small, with ease. What you may not know is that KPS Global can also provide you with everything else you need to outfit the box. Our purchasing power and volume translates to competitive pricing for you. It also gives you a single point of contact and one ship date. You can also trust our experienced and knowledgeable employees to help you make the right choice to complete the project.

## STOCK THE BOX

KPS Global stocks walk-in coolers and freezers to fit your needs. Everything you need to outfit your walk-ins including jamb guards, closers, LED lights and a thermometer. A variety of sizes are available to suit the most common applications. Packages are also available with refrigeration systems and insulated floors. Kits are available to ship within 48 hours.

## INSTALLATION

Not only does KPS Global provide you with the box and all of the components, we provide complete install services too. With the most experienced project management team in the business, we can handle the planning and coordination with a single-point-of-contact making the process seamless.

With our turnkey services, we can handle your remodels or replacement from start to finish! As General Contractors we arrange everything from ordering materials to hiring Subcontractors.

## PARTS

KPS Global offers a wide variety of aftermarket parts and replacement doors. We sell OEM parts for the most widely-used applications ranging from latches, hinges and gaskets, to liner panels and an assortment of door options.

Our commitment to your business is to deliver outstanding customer service, competitive pricing and on-time delivery.

## SERVICE

Our factory-trained service technicians are positioned throughout the U.S., providing 13 hours of service coverage. Repairs can be made onsite and backed by a 90-day workmanship warranty.

## SHELVING

Shelving systems maximize the amount of product you can store in a cooler or freezer and make restocking more efficient. We offer a variety of shelving to meet your needs. Whether you need gravity-fed shelving, movable shelving carts or adjustable flat shelves, we can provide custom configured systems.

## REFRIGERATION

In what environment will the equipment will be operating? Where will the unit be located? Will this be a holding room only? What is the entering temperature and pounds per hour loaded into the walk-in? What is the temperature to keep the product and in what time frame?

These are all key questions to ask when determining your refrigeration needs. Our in-house experts have over 100 years of refrigeration sizing experience in a variety of applications from convenience stores to large industrial projects and are available to help you! We offer ½ HP to 80 HP units from multiple manufacturers at competitive pricing. Plus, when you purchase through KPS Global, all of your components arrive together.

## LINER PANELS

Is your walk-in looking dated? KPS Global offers a variety of liner panels designed to reface and insulate existing ones. Our Liner Panels extend the life of the walk-in by up to five years, improve the R-Value and improve the aesthetic of the panel.

## LIGHTING

Lumen Output	Wireless Controls
Illuminance	Dimmable
Foot Candles	Wattage
Efficacy	Voltage
Color Rendering Index	Amp Rating
Color Temperature	Energy Consumption
Temperature Applications	Cost
Safety/Security	Product Life

Overwhelmed? Don't worry about trying to get it right, let our experts help. Plus, take advantage of the lowest prices in the industry. Rebates may also be available.
