

The patented **FUSIONFRAME®** cold storage panel system offers the Best of Both Worlds by integrating the structural benefits of wood with the high-performing insulative properties of foam, drastically enhancing the thermal performance and energy savings of cold storage units. With this system from KPS Global, you never have to compromise.

STRUCTURAL PERFORMANCE

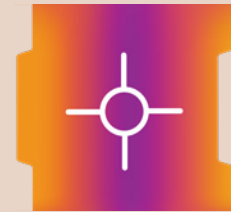

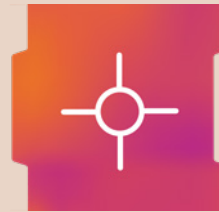

Comparable to traditional wood framed panels in span tests

THERMAL PERFORMANCE

FUSIONFRAME

WOOD

29.30
5" R-Value

6.25
5" R-Value

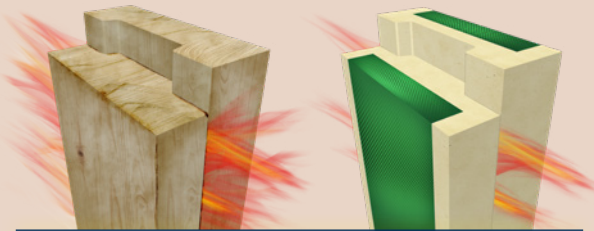

4X Better Thermal Performance

ENERGY PERFORMANCE

WOOD FRAME

FUSIONFRAME

Reduce heat gain through the envelope in POS freezers by 50%.

*Comparing 5" FUSIONFRAME to 5" Wood

LIFE-CYCLE BENEFITS

Extends the life of the walk-in envelope

Limits vapor infiltration

Limits icing of the joint space

Limits moisture absorption

Limits condensation development

Reduces life-cycle performance issues of traditional wood cold storage envelopes
